PHASE 2 ENTREPRENEUR RESEARCH ASSESSMENT
(Completed by Plan Owners)

This tool provides UCI Beall Applied Innovation (“Plan Owner”) with a consistent approach for meeting the assessment required by the State of California and guided by California’s statewide industry guidance.

Plan Owners should complete the below assessment and submit to the Executive Director or ORU director (“Authorized Official”) for approval. Plans utilizing layered tactics, such as combining physical distancing, frequent hand washing, consistent face covering use, and symptom self-screening practices may lower the potential for virus transmission.

Please complete this assessment by providing the requested information and checking the most appropriate/applicable box. Plan Owners should include any additional information about their assessment and planned protective measures in the Plan submitted to their Authorized Official(s).

Name of person completing this assessment: Kate Klimow, Chief Administrative Officer

Name of Business to which this assessment applies: UCI Beall Applied Innovation

SPACE & PHYSICAL DISTANCING

Exact location(s) of worksite: 5270 California Ave., Second Floor, Staff area

After reviewing the layout of the space(s) to be used in entrepreneurial research activities, the subtenant’s standard operating procedures and safety protocols, EH&S COVID-19 Learning Resources and Posters, Checklist for Phase 2 Research Activities, the General Points of Consideration – Planning the Phased Increased of UCI’s On-Site Research Activities, and the State of California industry guidance:

☐ No modifications, adjustments, and/or safety precautions over and above the campus minimum requirements are required to minimize the potential for virus transmission.

☒ Plan Owner will implement modifications, adjustments and/or safety precautions to minimize the potential for virus transmission.

☐ It is not possible to minimize potential for virus transmission – Plan Owner will reassess these activities later for Phase 3.

DISINFECTING SURFACES, EQUIPMENT & INSTRUMENTATION

After reviewing the research program’s current disinfecting procedures, the Cleaning Procedures for General Laboratories in Response to COVID-19, EH&S COVID-19 Learning Resources and Posters, Checklist for Phase 2 Research Activities, the General Points of Consideration – Planning the Phased Increased of UCI’s On-Site Research Activities, and the Guiding Principles contained in the Vice Chancellor’s May 11 message:

☒ No modifications, adjustments, and/or safety precautions over and above the campus minimum requirements are required to minimize the potential for virus transmission.

☐ Plan Owner will implement modifications, adjustments and/or safety precautions to minimize the potential for virus transmission.

☐ It is not possible to minimize potential for virus transmission – Plan Owner will reassess these activities later for Phase 3.

PERSONNEL HYGIENE & SELF-SCREENING FOR SYMPTOMS
After reviewing current hygiene procedures for this research program, UCI’s face coverings protocol, EH&S COVID-19 Learning Resources and Posters, Checklist for Phase 2 Research Activities, the General Points of Consideration – Planning the Phased Increased of UCI’s On-Site Research Activities, and the Guiding Principles contained in the Vice Chancellor’s May 11 message:

- No modifications, adjustments, and/or safety precautions over and above the campus minimum requirements are required to minimize the potential for virus transmission.
- Plan Owner will implement modifications, adjustments and/or safety precautions to minimize the potential for virus transmission.
- It is not possible to minimize potential for virus transmission – Plan Owner will reassess these activities later for Phase 3.

**TEAM COMMUNICATION & TRAINING**

After reviewing the current communication procedures and protocols for this research program, Checklist for Phase 2 Research Activities, the General Points of Consideration – Planning the Phased Increased of UCI’s On-Site Research Activities, and the Guiding Principles contained in the Vice Chancellor’s May 11 message:

- No modifications and/or adjustments are required to help ensure that team members receive timely, informative communications regarding the work plan.
- Plan Owner will implement modifications and/or adjustments to help ensure that team members receive timely, informative communications regarding the work plan.
- Not applicable – Plan Owner will reassess these activities later for Phase 3.

**UNIQUE CIRCUMSTANCES**

After conducting the above assessments, carefully contemplating the Checklist for Phase 2 Research Activities, the General Points of Consideration – Planning the Phased Increased of UCI’s On-Site Research Activities, and considering the nature and needs of the entrepreneurial activity

- No unique circumstances exist.
- Unique circumstances exist for which additional modifications, adjustments and/or safety precautions over and above the campus minimum requirements are required to minimize the potential for virus transmission.
- Unique circumstances exist, but even with additional modifications, adjustments and/or safety precautions it is not possible to minimize the potential for virus transmission – Plan Owner will reassess these activities later for Phase 3.
